

# DOMAIN E-GUARD TOUR SYSTEM (REAL-TIME GUARD TOUR SOLUTION)

WIDE RANGE OF APPLICATION IN FACTORY, WAREHOUSE, GATED-AND-GUARDED RESIDENTIAL & ALL KINDS OF BUILDINGS

## WHAT IS DOMAIN E-TOUR SYSTEM?

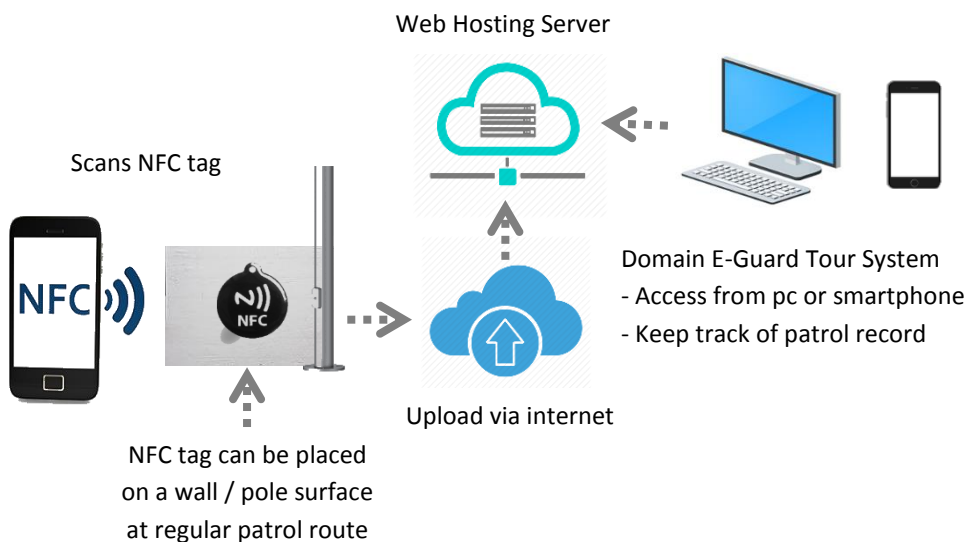

**Domain E-Tour System** is an advanced guard tour solution based on *Web* and *Mobile App* which designed to help factories and organizations to manage and monitor security guards patrolling activities in real time. It also provides an effective way to ensure that the security guards are following the scheduled do their patrol duties in predefined time.

## HOW DOES THE DOMAIN E- TOUR SYSTEM WORK?

The system uses *Near Frequency Communication (NFC)* technology to allow sending patrol data to web server in real-time basis. Each security guard is assigned an Android smartphone with NFC built-in features and NFC tags are attached at regular patrol route as a checkpoint. When guard scans NFC tags, the patrol data will be directly sent to web server.

## KEY FEATURES

- Using NFC tags which require no power source, small in size and easy to be placed on wall/pole surface
- Create and assign patrol schedules through the online web portal whenever you want
- Immediately send patrol information to system when NFC tags is scanned
- Guards able to view their individual patrol schedules directly from smartphones
- Automatic pop-up notification to remind/alert guards to start patrol
- Comprehensive built-in reports allow management to run anytime
- User-friendly interface and easy to use even guards with less IT knowledge
- Go green and eliminate manual filling
- Keep history log record
